

Create your Azure VM

- Logon to Azure with your RCSid and go to the ITWS1100 Lab

- o [ITWS-Student-DTLab-RPI - Microsoft Azure](https://portal.azure.com/#@rpi.edu/resource/subscriptions/92cc93c6-57ae-4ede-ab97-56dd35308fb5/resourceGroups/student-dtlab/providers/Microsoft.DevTestLab/labs/ITWS-Student-DTLab-RPI/overview)

<https://portal.azure.com/#@rpi.edu/resource/subscriptions/92cc93c6-57ae-4ede-ab97-56dd35308fb5/resourceGroups/student-dtlab/providers/Microsoft.DevTestLab/labs/ITWS-Student-DTLab-RPI/overview>

- Click +Add

The screenshot shows the Microsoft Azure portal interface for the ITWS-Student-DTLab-RPI DevTest Lab. The top navigation bar includes the Microsoft Azure logo, a search bar, and a Home link. The main header displays the lab name and a DevTest Lab icon. Below the header, there is a search bar and a row of action buttons: '<<', '+ Add' (circled in green), 'Refresh', 'Claim any', 'Delete', 'Feedback', and 'Forum'. The left sidebar contains a navigation menu with options like Overview, Getting started, Internal support, My Lab, Claimable virtual machines, All resources, My virtual machines, My environments, My data disks, My secrets, and Personal data. The main content area is divided into two sections: 'Essentials' and 'My virtual machines'. The 'Essentials' section lists key information: Resource group (student-dtlab), Status (Ready), Location (East US), Subscription (StudentCloud), and Subscription ID (92cc93c6-57ae-4ede-ab97-56dd35308fb5). The 'My virtual machines' section includes a description and a table with columns for Name, Status, and Auto-start, currently showing 'Nothing to display'.

Create your Azure VM

- Select ubuntu22-publicip-apache2

Microsoft Azure Search resources, services, and docs (G+/)

Home > ITWS-Student-DTLab-RPI >

Choose a base ...

Search to filter available bases

Name	Publisher ↑↓	OS type ↑↓
 ubuntu22-publicip-apache2	az_cherj2@rpi.edu	Linux
 CentOS-based 7.9	Rogue Wave Software (formerly OpenLogic)	Linux
 CentOS-Based 8.5	Rogue Wave Software (formerly OpenLogic)	Linux
 Ubuntu Server 20.04 LTS	Canonical	Linux
 Ubuntu Server 22.04 LTS	Canonical	Linux

Create your Azure VM

- Fill out the following fields
 - Virtual Machine Name – Your **RCSid** followed by **RPI** (eg rplotkaRPI)
 - User Name – Your RCSid
 - Password – pick a password
 - NOT your RCS password
 - REMEMBER IT!!!
 - Leave the rest as
 - Click Create
